After a fruitless search for relaxing, inspiring nature DVD's free of new age music or narration with an evolutionary slant, a team of filmmakers set out to photograph for themselves the rarely seen and often overlooked intricate details of God's glorious creation. The result of their efforts is a powerful new DVD series titled "America the Beautiful: The Marvelous Nature of God."

To capture the splendor and majesty of God's grand design, the filmmakers trekked to numerous awe-inspiring locations to gather all of the original footage in high definition specifically for this incredible new series.

From high mountain peaks to the depths of massive winding canyons, the wonders of Creation are presented with scripture and music to provide a resource that you can re-visit again and again as you seek inspiration or desire a time of quiet meditation.
